

EASA INTEGRATED ATPL

S K Y B O R N E

COURSE OVERVIEW

Our unique training methods will set you up to embark on a career as an airline pilot. You do not require any previous flying experience to apply because you will learn to fly the Skyborne way.

How long does the course take to complete?

Approximately 18 months.

Where will I train?

- Upon enrolment, you will be based at our Gloucestershire Airport HQ in the UK and will then spend time at our fair-weather base at Castellón Airport, Spain.
- Elements covered in UK: ATPL Theory, Multi-Engine Piston flying, UPRT and APS MCC.
- Elements covered overseas: Single Engine Piston flying.

Is there an age restriction?

- You must be at least 18 years old on the first day of the EASA Integrated ATPL(A) course.

Are there any medical requirements?

- A current and valid EASA Class 1 Medical Certificate is required before starting the ATPL(A) course; however, you can apply and complete selection prior to securing your Class 1.

What academic qualifications do you require?

- You must have completed secondary education and have at least 5 GCSEs (or equivalent). Some airlines may require additional academic qualifications.

Is there a language proficiency requirement?

- You must be able to demonstrate the ability to use the English Language in accordance with Part FCL, Subpart A, FCL.055 Language Proficiency.

Are there any finance and funding options available?

- We recognise that learning to fly can be expensive, so we are delighted to be working with several institutions to provide a range of funding solutions.
- Please consult the Finance and Funding part of our website for the most up-to-date information.

OUR EASA INTEGRATED ATPL COURSE TAKES YOU FROM COMPLETE BEGINNER TO FULLY QUALIFIED COMMERCIAL AIRLINE PILOT IN 18 MONTHS

GIVE YOUR CAREER THE BEST POSSIBLE START

DELIVERING EXCELLENCE

Skyborne's innovative and in-depth approach to airline pilot training is raising the bar. Due to our combined expertise and vast industry experience, we know what airlines are looking for from newly qualified pilots.

We are unique in truly integrating theoretical knowledge with practical flight training from the very first stages of your course. As you experience our Progressive Continuous Learning methodology, you will develop your talents and absorb new skills from our vastly experienced instructors.

From the start of your training you will be immersed in airline philosophy, custom and practice to better prepare you for airline operations. Skyborne graduates have already been placed with some of the UK's leading airlines, with more pilots continually undergoing airline selection. Skyborne delivers the highest quality training and we continue to strengthen our links with airlines across Europe and beyond.

Get ready to learn to fly the Skyborne way.

DEVELOPING CHARACTER IN A CAMPUS-STYLE ENVIRONMENT

A HOME AWAY FROM HOME

We recognise that in order to thrive, you need to feel comfortable in your surroundings, as you complete your training both in the UK, and at our fair-weather base in Spain.

At Gloucestershire Airport we are developing bespoke accommodation, where you will have your own en suite room, giving you the perfect space to study independently and relax away from the training centre.

Communal kitchens will be located on each floor, with laundry facilities and large common rooms. We have also incorporated a large outdoor relaxation and BBQ area for you to socialise after a busy week of flight training.

At Castellón Airport you will stay in well-equipped apartments, within walking distance of the beautiful Mediterranean coast and local amenities. In your downtime you'll also be able to enjoy all that Spain has to offer, with cars available to share.

THE PERFECT LOCATION FOR SIX MONTHS OF FLYING TRAINING

YEAR-ROUND PERFECT CONDITIONS

Castellón Airport, our fair-weather training base, is in the optimum location. With Barcelona to the north, Valencia to the south and the Balearic Islands eastwards over the Mediterranean Sea, it provides the perfect surroundings in which to spend six months immersed in flight training.

We chose Castellón Airport due to its year-round flying conditions and superb flight training environment, with modern classrooms and a student crew room overlooking the runway. With good transport links around the region Castellón is ideally positioned for you to complete your core Single Engine Piston (SEP) flight training.

OUR FACILITIES ARE DESIGNED WITH YOU IN MIND

A PURPOSE-BUILT ACADEMY

We have built Skyborne from the ground up, starting with our headquarters at Gloucestershire Airport. Our 13,000 square foot training centre boasts five large classrooms, two industry leading flight simulators, including the industry's first fixed-base Boeing 737 MAX FTD simulator and a bespoke selection and assessment suite.

From the Skyborne flight operations centre, you will have direct access to a dedicated ramp with a short taxi to the runway. There are also lounge facilities and open-plan work zones so you can work in absolute comfort.

All of this has been developed with you in mind, allowing you to completely immerse yourself in your pilot training.
